

Hotel Room Booking Reports Suite

Zoho Creator — Step-by-Step Report Builder Guide

Assignment 03 • Nine Report Types

This guide converts the uploaded assignment into simple click-by-click instructions and includes real Zoho Creator UI examples for orientation.

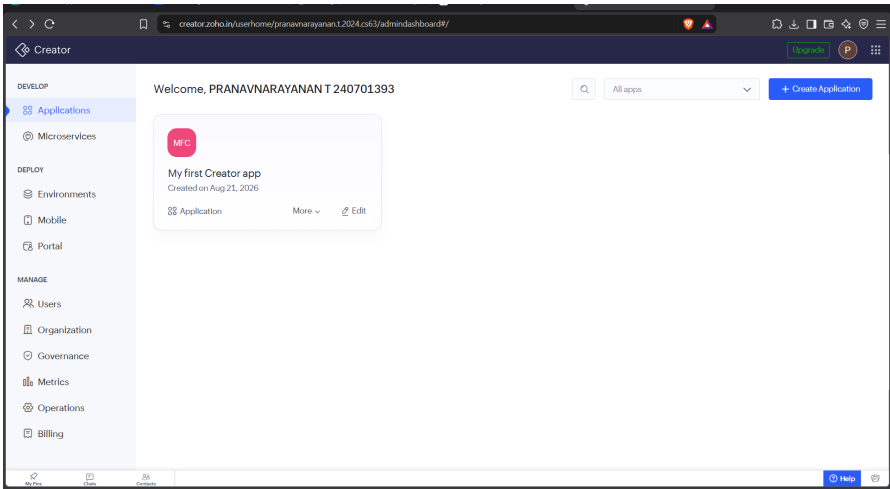

Base Form: Room_Booking_Form **Required Reports:** 9

The assignment requires all nine Zoho Creator report types: List, Spreadsheet, Kanban, Calendar, Map, Timeline, Pivot Table, Chart, and Summary.

1. Real Zoho Creator UI Examples

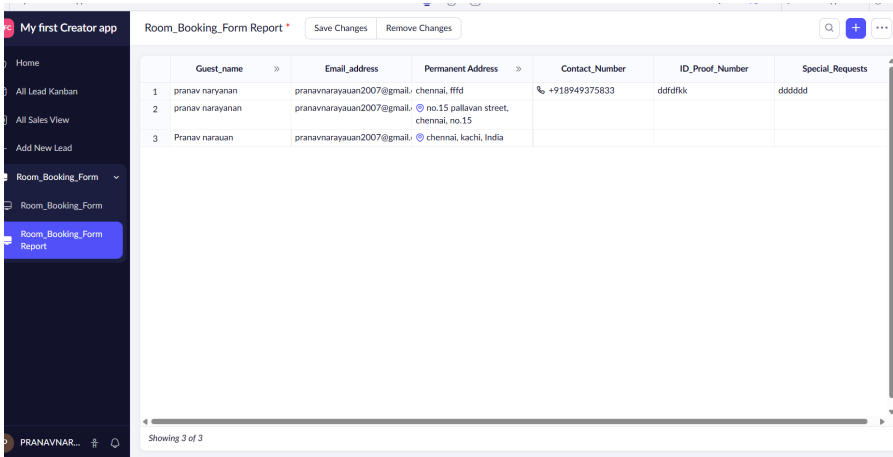

These real Creator interface screenshots help you recognize the application, form, and report editing areas while building your own reports.

Example 1 — Creator application area

Use this type of editing area as your starting point before opening Reports.

Example 2 — Report area

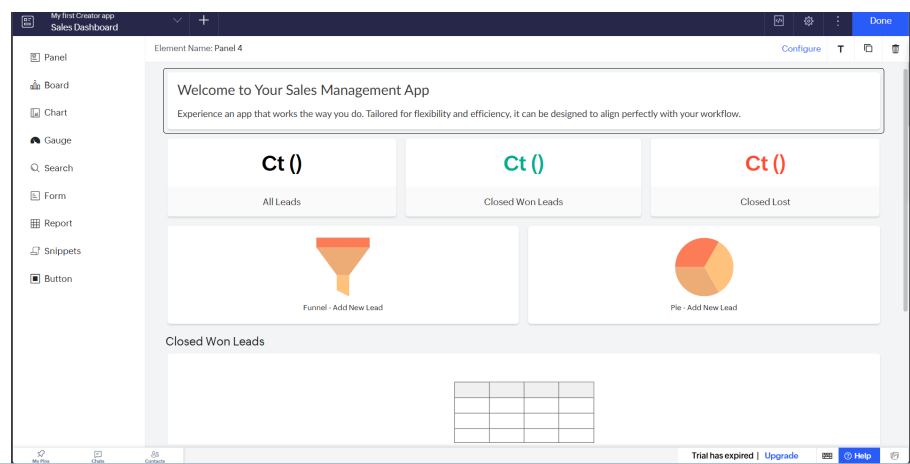

Your nine reports will be created from the Room_Booking_Form data source.

2. More Real Creator Examples

Example 3 — Form/report configuration interface

The screenshot shows the 'Room_Booking_Form' configuration interface in Zoho Creator. On the left is a dark sidebar with navigation options: Home, All Lead Kanban, All Sales View, Add New Lead, Room_Booking_Form (selected), and Room_Booking_Form Report. The main area displays the form layout with fields for Guest_name (First Name, Last Name), Email_address, Permanent Address (Address Line 1, Address Line 2), City / District, State / Province, Postal Code, Country, Contact_Number (+91 81234 56789), ID_Proof_Number, and Special_Requests.

Example 4 — Creator application view

Use these images as interface references. For the final lab record, capture the corresponding screens from your own Hotel Room Booking application.

3. The Nine Reports at a Glance

#	Report Type	Report Name	Main configuration
1	List	All_Bookings_List	Guest, Contact, Room Type, Check-In Date, Status; sort by Check-In Date
2	Spreadsheet	Bookings_Spreadsheet	Editable status columns; grouped by Room Type
3	Kanban	Booking_Status_Kanban	Status columns: Enquiry → Confirmed → Checked-In → Checked-Out
4	Calendar	Checkin_Schedule_Calendar	Based on Check_In_Date
5	Map	Guest_Origin_Map	Permanent_Address; pins by Room Type
6	Timeline	Booking_Activity_Timeline	Booking date / Check-In Date; grouped by week
7	Pivot	RoomType_By_MealPlan_Pivot	Rows Room_Type; columns Meal_Plan; count bookings
8	Chart	RoomType_Popularity_Chart	Bar chart; X Room_Type; Y Count of Bookings
9	Summary	Guest_Stay_Summary	Group Guest_Name; count bookings and sum Number_Of_Guests

The report names and configurations above are taken directly from the assignment's mapping table. ■filecite■turn8file0■L26-L55■

4. List View — All_Bookings_List

Purpose: Give the front office a searchable flat list of all bookings.

Steps

1. Open your Hotel Room Booking app and go to **Reports**.
2. Choose **Create Report** / add a new report based on **Room_Booking_Form**.
3. Choose **List** as the report type.
4. Name it **All_Bookings_List**.
5. Add Guest Name, Contact Number, Room Type, Check-In Date, and Booking Status.
6. Set sorting to Check-In Date in ascending order.
7. Enable the search bar and column filters for Room Type, Booking Status, and Check-In Date.
8. Save and preview with sample booking data.

Assignment configuration

- Default landing report for the front-office manager.
- Nearest arrivals should appear first.
- Search and column-level filters should be available.

Screenshot to capture: Report Builder showing List View and its selected columns, plus the final report with sample data.

5. Spreadsheet View — Bookings_Spreadsheet

Purpose: Allow front-office staff to update operational status in bulk.

Steps

1. Create another report from **Room_Booking_Form**.
2. Choose **Spreadsheet** as the report type.
3. Name it **Bookings_Spreadsheet**.
4. Add the booking columns needed by staff.
5. Make Check-In Status, Check-Out Status, and Housekeeping Status inline-editable.
6. Keep all other columns read-only.
7. Group the report by **Room Type**.
8. Save and test an inline status change.

Assignment configuration

- Only the three status columns are editable.
- Front Office role should have edit permission.
- Report is intended for daily bulk updates.

Screenshot to capture: Spreadsheet Report Builder plus a before/after screenshot of an inline status edit.

6. Kanban View — Booking_Status_Kanban

Purpose: Visually track bookings through the hotel processing stages.

Steps

1. Create a report based on **Room_Booking_Form**.
2. Choose **Kanban** as the report type.
3. Name it **Booking_Status_Kanban**.
4. Set the grouping/status field to **Status**.
5. Configure the columns: Enquiry, Confirmed, Checked-In, Checked-Out.
6. Configure each card to show Guest Name and Room Type.
7. Save and drag one sample card to the next stage.
8. Verify that the underlying Status field changes.

Assignment configuration

- Card movement should update Status automatically.
- The assignment requires a timestamp when the status changes.
- Use a before/after screenshot for the drag action.

Screenshot to capture: Kanban Builder and before/after screenshots showing a card moved between columns.

7. Calendar View — Checkin_Schedule_Calendar

Purpose: Help front office and housekeeping plan arrivals and room readiness by date.

Steps

1. Create a report from **Room_Booking_Form**.
2. Choose **Calendar** as the report type.
3. Name it **Checkin_Schedule_Calendar**.
4. Use **Check_In_Date** as the calendar date field.
5. Configure the day cell to show the expected-arrival count and room-type breakdown.
6. Limit the operational view to the current and upcoming month.
7. Save and click a date to drill down into that day's arriving guests.

Assignment configuration

- The calendar is based on Check_In_Date.
- Date cells should show expected arrivals and room-type breakdown.
- A date click/drill-down is required as an example interaction.

Screenshot to capture: Calendar Builder and a before/after screenshot of a date drill-down.

8. Map View — Guest_Origin_Map

Purpose: Show where guests are coming from geographically.

Steps

1. Create a report from **Room_Booking_Form**.
2. Choose **Map** as the report type.
3. Name it **Guest_Origin_Map**.
4. Set the location source to **Permanent_Address**.
5. Enable/configure geocoding for the address field.
6. Set the pin category/color grouping to **Room Type** if supported by the current Creator UI.
7. Save and preview the map with sample addresses.

Assignment configuration

- Permanent_Address must be geocode-enabled for accurate placement.
- Pins are configured by Room Type.
- This report is intended for the marketing team.

Screenshot to capture: Map Report Builder and a map with sample guest-origin pins.

9. Timeline View — Booking_Activity_Timeline

Purpose: Let management see booking momentum across the season.

Steps

1. Create a report from **Room_Booking_Form**.
2. Choose **Timeline** as the report type.
3. Name it **Booking_Activity_Timeline**.
4. Use Booking_Submitted_On if available through the advanced-field extension; otherwise use Check_In_Date as specified.
5. Group the timeline by week.
6. Configure the timeline to show cumulative bookings.
7. Save and verify the trend using sample records.

Assignment configuration

- Refresh the data daily.
- The assignment allows Booking_Submitted_On or Check_In_Date.
- Use weekly grouping.

Screenshot to capture: Timeline Builder and the resulting weekly booking timeline.

10. Pivot Table — RoomType_By_MealPlan_Pivot

Purpose: Cross-tabulate room type and meal plan to support F&B; planning.

Steps

1. Create a report from **Room_Booking_Form**.
2. Choose **Pivot Table** as the report type.
3. Name it **RoomType_By_MealPlan_Pivot**.
4. Set Rows = **Room_Type**.
5. Set Columns = **Meal_Plan**.
6. Set Values = **Count of Bookings**.
7. Configure blank cells to display as zero.
8. Save and preview with sample records.

Assignment configuration

- Rows must be Room_Type.
- Columns must be Meal_Plan.
- Values are the count of bookings.
- Blank cells should display as zero.

Screenshot to capture: Pivot Builder showing rows/columns/values and the completed pivot table.

11. Chart View — RoomType_Popularity_Chart

Purpose: Visualize booking count by room type as a bar chart.

Steps

1. Create a report from **Room_Booking_Form**.
2. Choose **Chart** as the report type.
3. Name it **RoomType_Popularity_Chart**.
4. Choose **Bar Chart**.
5. Set X-axis = **Room_Type**.
6. Set Y-axis/aggregate = **Count of Bookings**.
7. Enable auto-refresh whenever a new booking is submitted.
8. Save and verify the chart using sample records.

Assignment configuration

- Bar chart.
- X-axis Room_Type.
- Y-axis Count of Bookings.
- Auto-refresh on new booking.

Screenshot to capture: Chart Builder configuration and the resulting bar chart with sample data.

12. Summary View — Guest_Stay_Summary

Purpose: Summarize guest booking activity for loyalty/CRM tracking.

Steps

1. Create a report from **Room_Booking_Form**.
2. Choose **Summary** as the report type.
3. Name it **Guest_Stay_Summary**.
4. Group records by **Guest_Name**.
5. Add Count of Bookings.
6. Add Sum of Number_Of_Guests.
7. Use case-insensitive, trimmed grouping to avoid duplicate guest entries caused by spelling/case differences.
8. Save and verify the summary with repeated sample guest names.

Assignment configuration

- Group by Guest_Name.
- Summary columns: Count of Bookings and Sum of Number_Of_Guests.
- Grouping should be case-insensitive and trimmed.

Screenshot to capture: Summary Builder and the resulting grouped guest summary.

13. Final Workflow + Submission Checklist

Recommended test order

1. Submit several records through Room_Booking_Form.
2. Verify All_Bookings_List and Bookings_Spreadsheet.
3. Move a booking card in Booking_Status_Kanban.
4. Click a date in Checkin_Schedule_Calendar and capture the drill-down.
5. Verify Guest_Origin_Map pins.
6. Verify Booking_Activity_Timeline trend.
7. Verify RoomType_By_MealPlan_Pivot.
8. Verify RoomType_Popularity_Chart.
9. Verify Guest_Stay_Summary.

Lab record screenshots required by the assignment

- Each of the nine reports in its configured state with sample data.
- Report Type selector in Report Builder for each report.
- At least one drill-down/interaction, such as clicking a calendar date or dragging a Kanban card, with before/after screenshots.

The assignment states these deliverables on page 5. ■filecite■turn8file0■L232-L238■

Important: The real Zoho UI examples in this PDF are orientation images. For submission, use screenshots from your own Hotel Room Booking app so your evaluator can verify the nine configured reports.

The assignment's workflow summary also maps each report to its stakeholder use: front office, housekeeping, marketing, and management. ■filecite■turn8file0■L206-L220■

14. Quick Reference

List: All_Bookings_List

Spreadsheet: Bookings_Spreadsheet

Kanban: Booking_Status_Kanban

Calendar: Checkin_Schedule_Calendar

Map: Guest_Origin_Map

Timeline: Booking_Activity_Timeline

Pivot: RoomType_By_MealPlan_Pivot

Chart: RoomType_Popularity_Chart

Summary: Guest_Stay_Summary

Base Form: Room_Booking_Form

All nine report types and their mappings are specified in the uploaded assignment. ■filecite■turn8file0■L26-L28■
