

Hotel Room Booking Form

Zoho Creator — Quick Step-by-Step Project Guide

Based on Assignment-03: Hotel Room Booking Form — Basic Fields Use Case.

1. What You Need to Build

Create a Zoho Creator application containing a form named **Room_Booking_Form** and a report named **Room_Booking_Report**. The form must use all 13 Basic Field types, apply the specified validations, and contain at least three sample submitted records.

2. Application Setup

1. Open Zoho Creator and sign in.
2. If your account says you have reached the one-application limit, open your existing application instead of creating another one.
3. Click the + button to add a component.
4. Choose **Form** → blank form.
5. Name it **Room_Booking_Form**.

3. Add the 13 Basic Fields

#	Zoho Basic Field	Required Field Name
1	Name	Guest_Name
2	Email	Email_Address
3	Address	Permanent_Address
4	Phone	Contact_Number
5	Single Line	ID_Proof_Number
6	Multi Line	Special_Requests
7	Number	Number_Of_Guests
8	Date	Check_In_Date
9	Time	Preferred_Checkin_Time
10	Drop Down	Room_Type
11	Radio	Meal_Plan
12	Multi Select	Amenities_Required
13	Checkbox	Agree_To_Hotel_Policies

4. Arrange the Form into Four Sections

Section A — Guest Details: Guest Name, ID Proof Number, Number of Guests

Section B — Contact Details: Email Address, Contact Number, Permanent Address

Section C — Room & Stay Preferences: Room Type, Meal Plan, Amenities Required, Special Requests

Section D — Scheduling & Policy Acknowledgement: Check-In Date, Preferred Check-in Time, Policy Checkbox

5. Configure Choice Fields

Room Type (Drop Down): Single Room; Deluxe Double Room; Twin Room; Family Room; Suite

Meal Plan (Radio): Room Only; Breakfast Included; All Meals Included

Amenities Required (Multi Select): Extra Bed; Airport Pickup; Late Checkout

6. Required Validations

Field	Validation / Setting
Guest Name	Mandatory
ID Proof Number	Mandatory
Number of Guests	Mandatory; minimum 1, maximum 6
Room Type	Mandatory
Check-In Date	Mandatory; past dates not allowed
Policy Checkbox	Mandatory; must be checked before submission
Email	Email format validation
Phone	Indian country-code format

7. Save and Create the Report

Click **Done/Save** in the Form Builder. Open the report associated with the form and use the name **Room_Booking_Report**. The report is used by the front office to review submitted booking requests and filter by room type and check-in date.

8. Enter Three Sample Records

Guest	Guests	Room	Meal Plan	Amenities
Anitha Selvam	3	Deluxe Double Room	Breakfast Included	Extra Bed, Airport Pickup
Rahul Kumar	2	Suite	All Meals Included	Late Checkout
Priya Shah	4	Family Room	Room Only	Extra Bed

9. Final Submission Screenshots

Take these three screenshots:

Screenshot 1 — Form Builder: Show the form with all 13 Basic Fields.

Screenshot 2 — Live Preview: Show the working Hotel Room Booking Form.

Screenshot 3 — Report: Show Room_Booking_Report containing at least three submitted records.

10. Final Checklist

- Application opened/created
- Room_Booking_Form created
- All 13 Basic Fields added
- Four sections arranged
- Room Type choices configured
- Meal Plan choices configured
- Amenities configured
- Mandatory fields configured
- Guests restricted to 1–6
- Past check-in dates blocked
- Policy checkbox required
- Room_Booking_Report created
- Three sample records submitted
- Three required screenshots captured

Project workflow: Guest opens form → enters booking details → Zoho validates the fields → record is created → front office reviews the report.
